

# Tree Disease Management

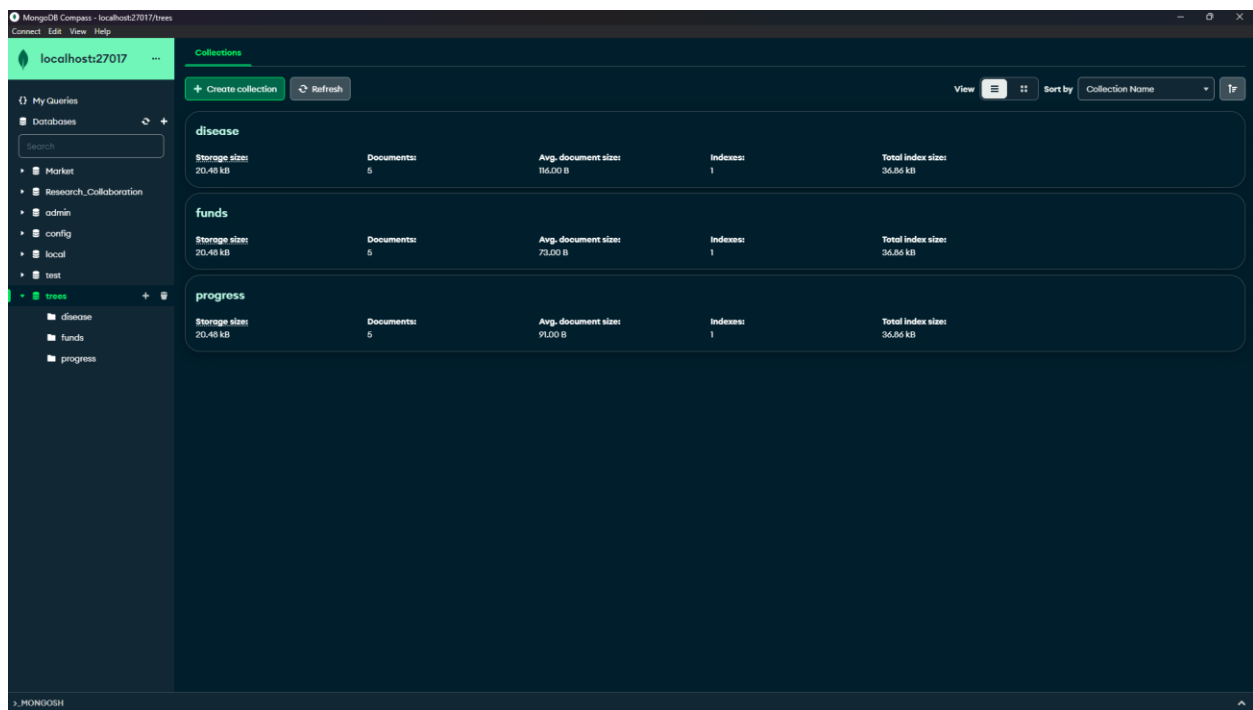

Go Campus Green

Database used:- **MongoDB**

Database name:- **Trees**

Inside Trees database I have made three collections:

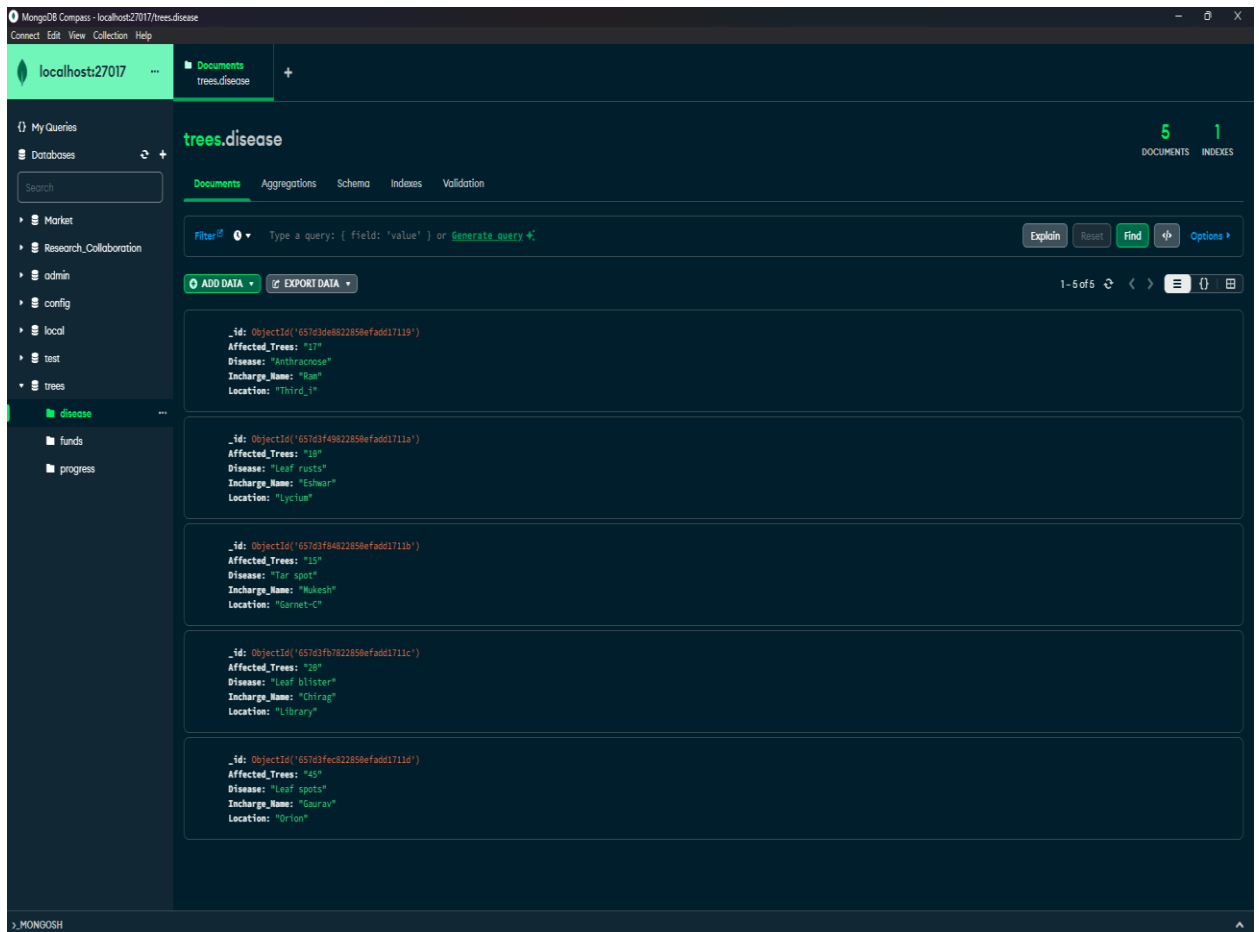

1. Disease
2. Funds
3. Progress

## 1\_Collection: **disease**

Inside this I have table which contains five records and four fields corresponds to each record.

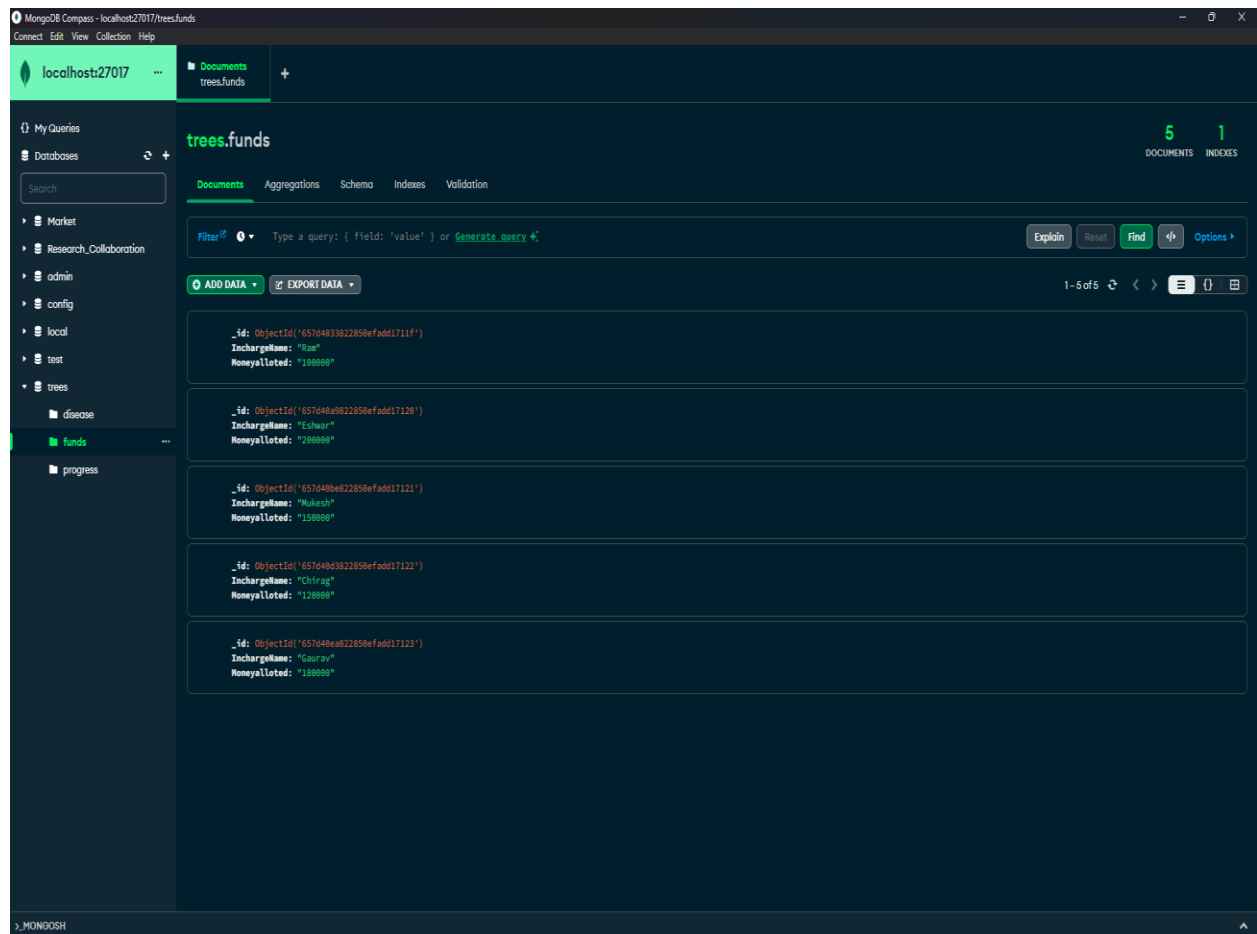

1. Incharge\_Name
2. Location
3. Disease
4. Affected\_Trees

## 2\_Collection: **funds**

Inside this I have table which contains five records and two fields corresponds to each record.

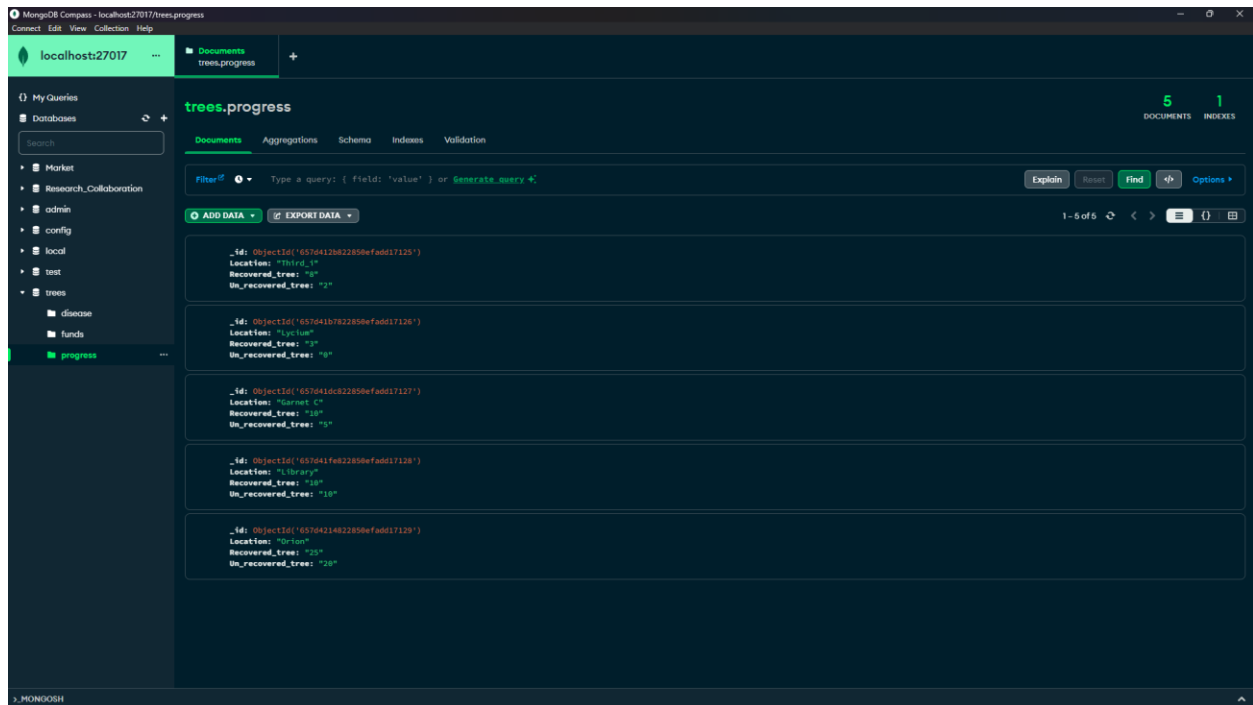

1. InchargeName
2. Moneyalloted

### 3\_Collection: **progress**

Inside this I have table which contains five records and three fields corresponds to each record.

1. Location
2. Recovered\_tree
3. Unrecovered\_tree

## Website Information:

Frontend languages: **HTML, CSS, JAVASCRIPT**

My website contains three webpages:

1. Disease
2. Funds
3. Progress

## Workflow:

**Step 1:** When gardener encounters any plant or tree disease in NIT Trichy campus. He informed this to that area incharge. Incharge get the details about number of trees affected and disease which affected the plants and trees. He updates the database corresponding to location wise affected tree counts are given.

**Step 2:** Incharge request for funds from NIT Trichy management for fertilizers and other necessary stuffs required to treat the plants and tree. Management look for

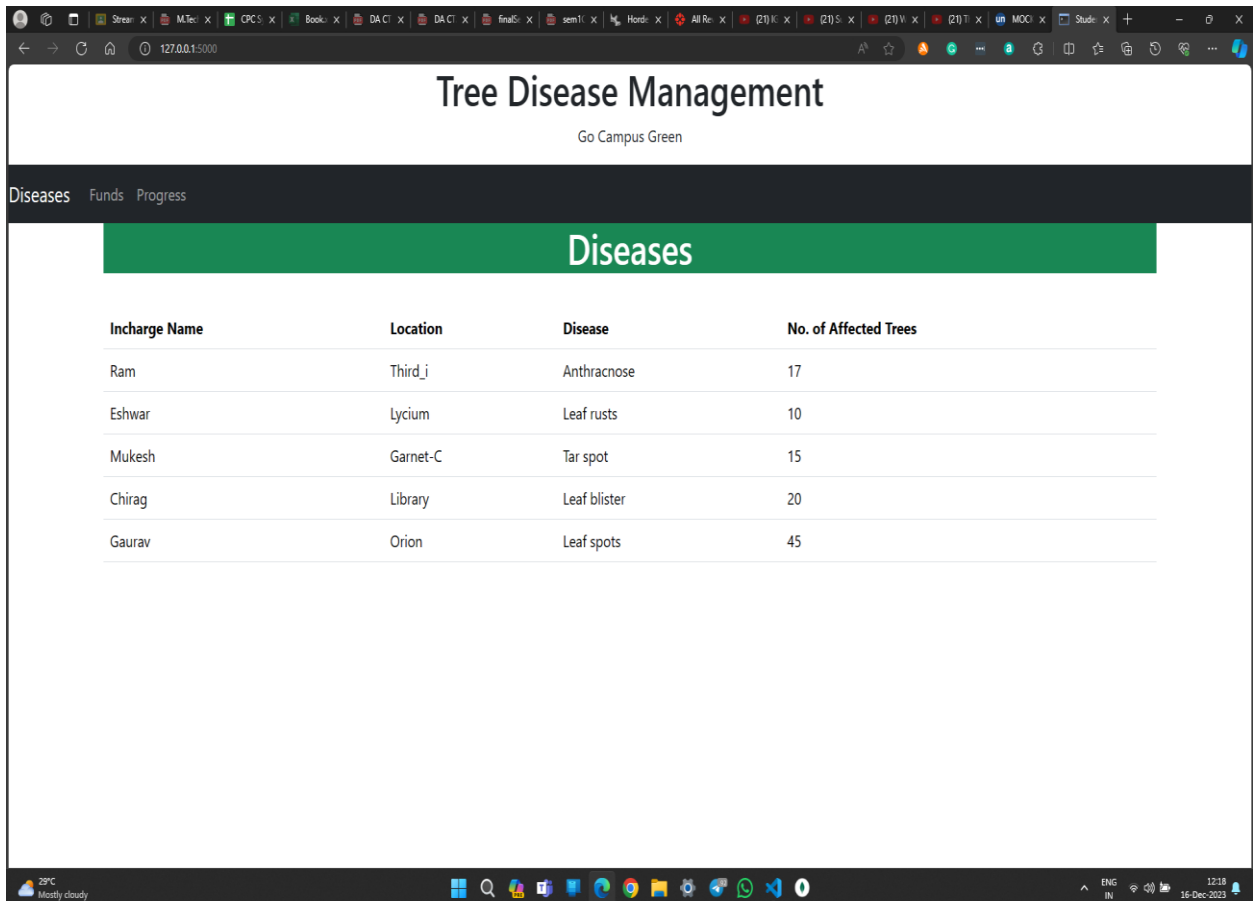

number of affected trees and related disease accordingly assign funds to respective incharges. Allotted funds are updated in database.

**Step 3:** Funds are used for necessary items for treatment of plants and trees disease and with in period the incharge updates the number of recovered tree and unrecovered tree periodically.

### First page of website:

Where you can find

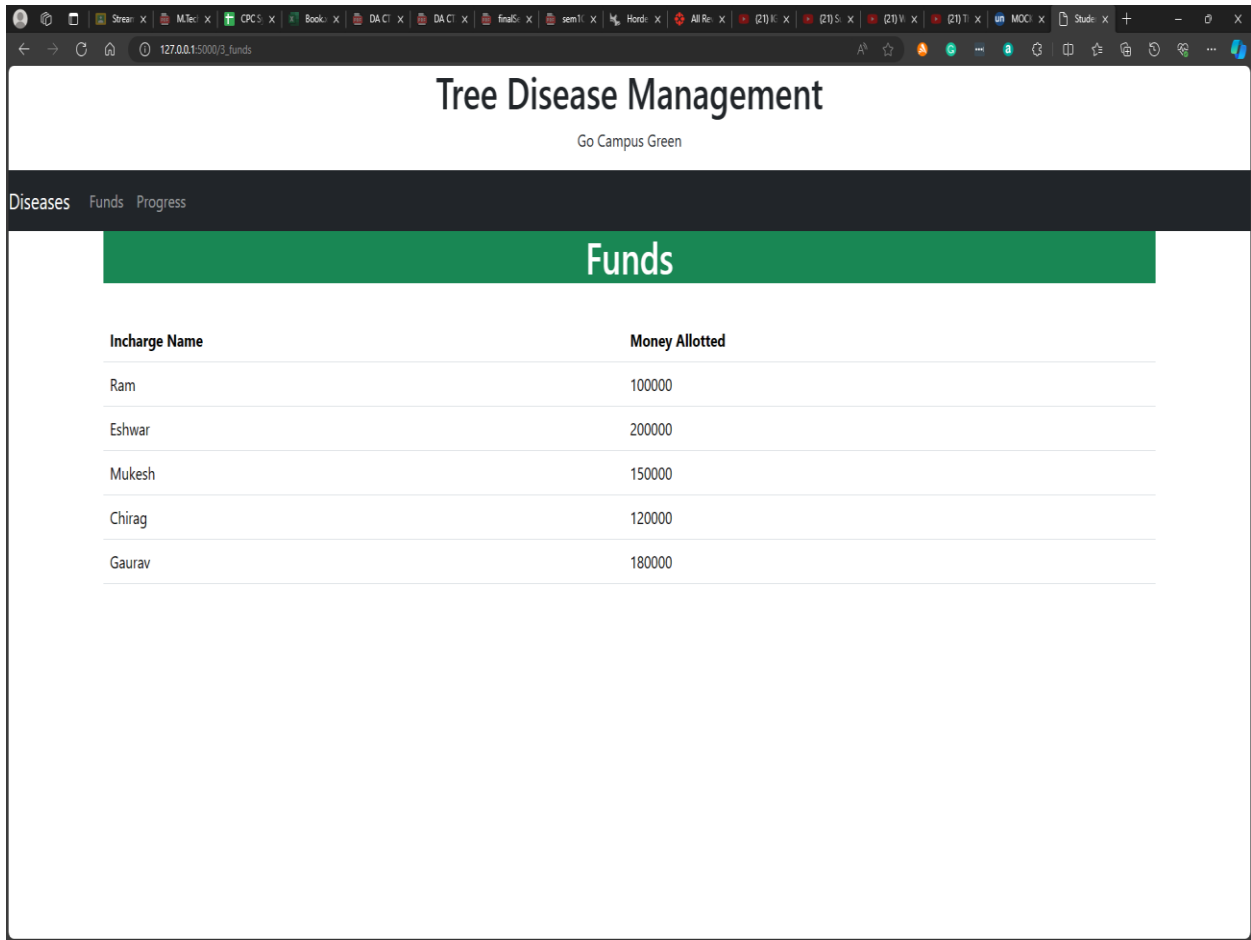

1. No. of trees affected
2. Name of Disease affected the tree
3. Incharge of particular area

Incharge Name	Location	Disease	No. of Affected Trees
Ram	Third_i	Anthrachnose	17
Eshwar	Lycium	Leaf rusts	10
Mukesh	Garnet-C	Tar spot	15
Chirag	Library	Leaf blister	20
Gaurav	Orion	Leaf spots	45

## Second page of website:

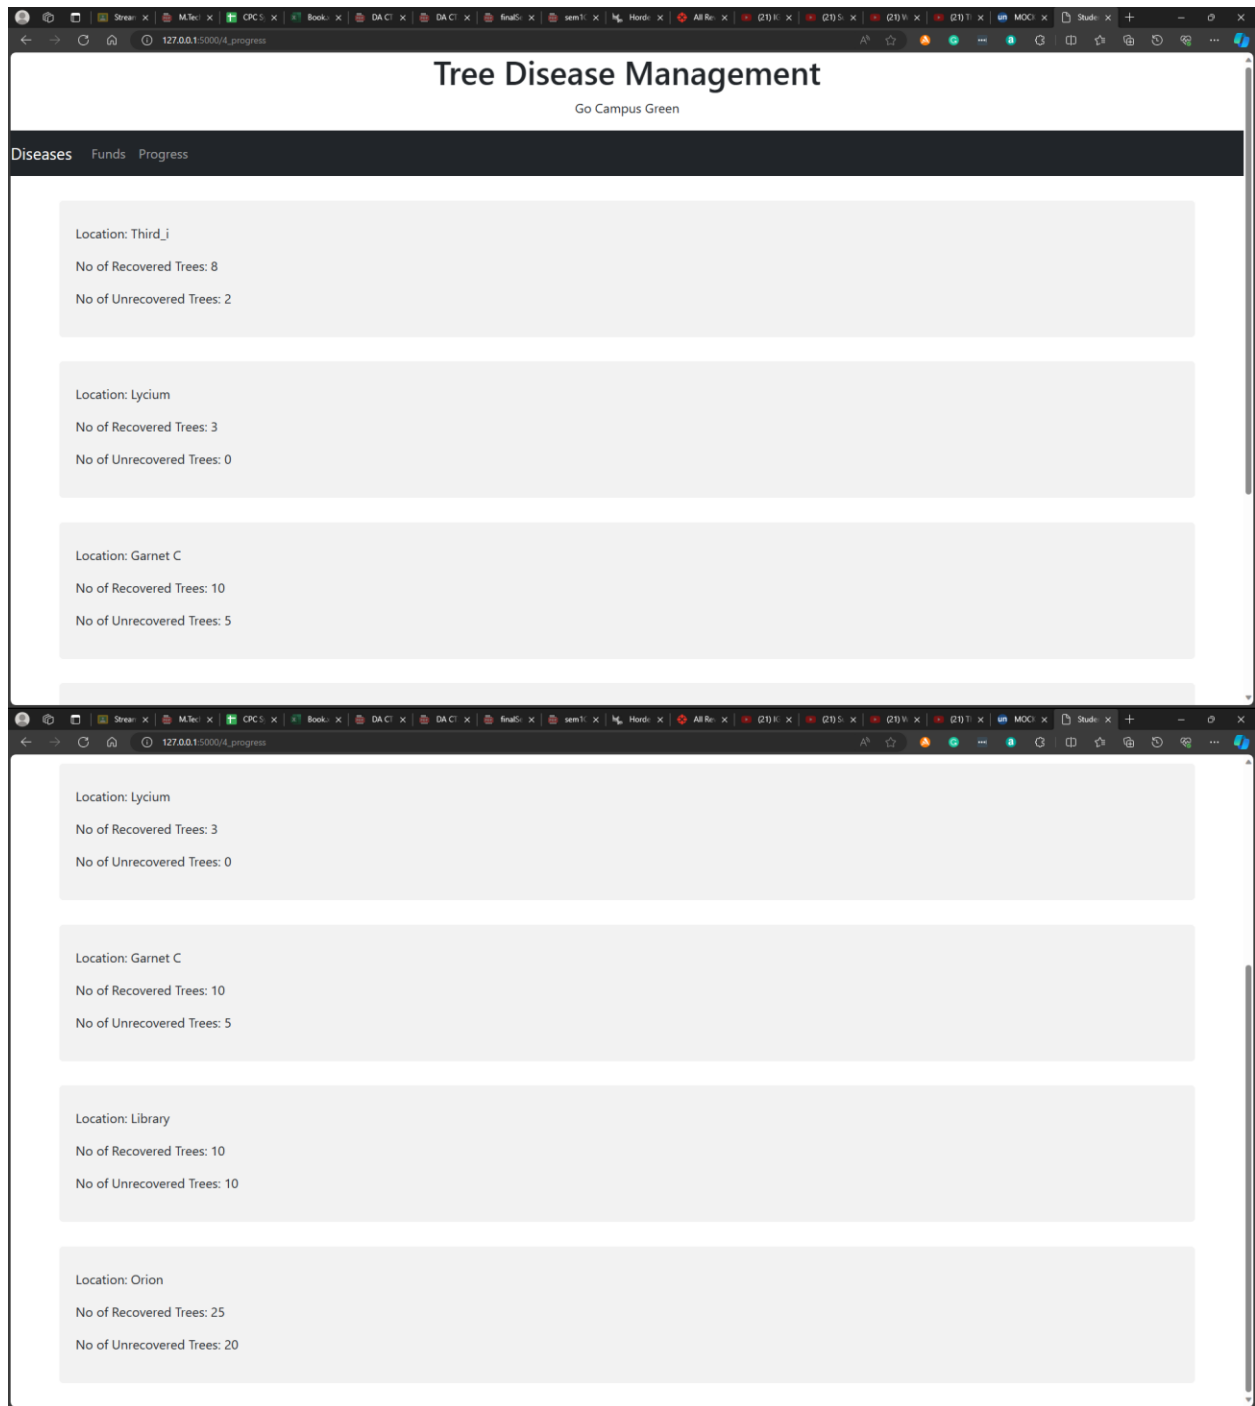

Where you can find how much money is allotted for which incharge.

Funds	
Incharge Name	Money Allotted
Ram	100000
Eshwar	200000
Mukesh	150000
Chirag	120000
Gaurav	180000

## Third page of website:

Where we can find after fund raised and after a fixed period how many trees got recovered from the disease and how many are still going under treatment.
